From automation to smart home products, and everything between them, these apps allow you to work with some help. From Assistant Routines to Google Clock's huge expansion of Assistant-compatible smart home devices to an overhaul of visual responses, this is a busy year for Google Assistant. It seems like a century ago when Android Auto added Google Assistant, but this simple addition made millions of drivers safer, especially with their long, frustrating holiday drives. The free Google Play Tasker stagnated a bit in previous years, but as the new owner of João Dias - maker of the AutoApps plugin suite and Tasker's most ardent fan - took over, the automation app has seen a UI overhaul and major innovations. But the big thing is that there's a keyboard application that works for everyone, regardless of what's basic, or if you want to go to the extremes of customization. Gboard's keyboard continues to dominate the market with an ever-expanding range of features on Android, iOS and soon Chromebooks. Some of this year's additions, which include options such as making your emoji pack or gifs, may seem trivial, but Gboard has also added support for dozens of new languages, as well as recent floating keyboard mode, which makes filling forms a breeze. Some of these mobile browsers have become so powerful that you can install extensions while others offer the most private browsing experience possible. And hey, one of our picks even gives our users the ability to make some dough while surfing. While ads help some keep lights in, they can be really annoying if you're just trying to control the latest article. With a browser like Brave, you are guaranteed to get the best Adblock browser while gaining a fast and secure browsing experience. There are also additional benefits Brave will pay you to browse the web at your own pace and how you want it. And if you already have a Samsung device and you use this browser, you'll get even more features not available elsewhere, such as the integration of Gear VR and more. Free Google Play google chrome is a de facto choice for many and good reason: it just works. Google has worked tirelessly to bring new features to the app with fresh and crisp design. Free Google Play Best File Management Apps Source: Andrew Myrick/Android Central While many of us have changed the way we use our phones, there's thing that will never change - we download a lot of things. I'm not only talking about apps, but also about music files, documents, PDFs or even new wallpapers. It is important to keep your files organized so you know where everything is or get rid of these lean memes. If you have a tendency to download boatoad files from your smartphone, you need Simple File Manager Pro to keep them organized. Free Google Play Best Social Media Apps Source: Android Central Social Media is a moody nurse. It can be a great source of news and information and an easy way to keep in touch with your friends, but it's also frustrating when the latest trends and memes slog up your schedule. Fortunately, there are many different platforms to share your voice with like-minded people or create a fantastic community. I've been a third-party Reddit stalker for years, but this year the official Reddit app breezed past Relay, Boost, and the rest of the top app of choice. Reddit's new website appearance is the source of a lot of small discussion, but I've rather enjoyed the way the new website looks at the continued improvements to the Android app. Now, if only / r / Writing Ask not to suck all my dinner breaks ... The popularity of free Google Play Instagram continues to grow and it seems that there's just something that all competitors can do to stop it. This app is one of the best and easiest ways to share your favorite photos, whether you're following your life or like editing goofy pictures. Plus, you get features like IGTV from some of your favorite creators, and the app is easy to find even more people/brands to follow. Free Google Play Let's Be Honest. There are many Twitter apps in the Play Store, and while many of them are pretty good, none of them compete with Fenix 2. Get private messaging, free cloud storage, and different ways to make your photos and videos perfect. Free w / Ads on Google Play Best Photography Apps Source: Andrew Martonik/Android Central After years of potato pictures on mobile devices, we are finally in a place where our smartphones can take better pictures than some DSLR cameras. The Play Store opens the door to many different apps to take, edit, and store photos that act as a digital memory bank in some respects. ProCam X unlocks the potential of what your smartphone camera is capable of, which is quite a lot nowadays. The application allows you to control various aspects of your image by offering professional controls such as ISO, white balance, and even geo-marking. With this app, you can even take RAW photos, which will open up even better image editing after the fact. For \$5 on Google Play after you've been photographed, chances are you want to change it. With Adobe Lightroom, you can make easy edits, or step things up the line and change like a pro, directly to your smartphone. Adobe even has a built-in pro-level camera so that Lightroom becomes its all-in-one solution for your mobile phone photography needs. Free w/IAP Google Play For those who care more about backing up their photos and less about pro-level editing, then the only real choice is Google Photos. The app itself gives users some basic photo editing options, while occasionally gives you stylized photos of how Google thinks your photo should look. You can also get smart autoalbums, photo books, and you can create shared albums in just a few seconds. Free Google Play Our smartphone cameras are more powerful today than ever, and we're not just talking about taking pictures. With an app like FILMIC Pro, you can take professional-level videos, and gain full control of the editing process. Those already familiar with recording video on the DSLR feel right at home without the need to lug around the camera bag. \$15 for Google Play Best Customization Apps Source: Joe Maring/Android Central's biggest benefit to Android, compared to the competition, is the ability to customize almost every aesthetic aspect of your device. From gadgets you use to the look of the app drawer and even the settings menu, you can customize everything. These are the best apps you can use to get the exact look you want on your smartphone. When, at the beginning of the year, you told me that I was using a launcher. Had Smart Launcher, I would have laughed in my face. Then Smart Launcher 5 arrived and I fell in love. The flexibly categorized app drawer is better than ever, and with the integration of Icon Pack Studio and checkless widget system, the SL5 makes building and switching themes a breeze. Free w/IAP Google Play Lawn Manager 2 gives you that Pixel Launcher feel, all the customizations that you can find for other third-party launchers. There is support for Adaptive icons, along with new Drawer category features, and more. Use a lawn chair to create the most sophisticated or basic launchers on your mobile device. Free Google Play big brother Kustom Widget maker KWGT, Kustom Live Wallpaper's one-stop theming has grown to me significantly this year. While SL5 squared widgets are nice, nothing beats exactly, edge-to-edge widget and element placement at KLWP. Formulas and menus can be daunting, but KLWP's strong community, especially Reddit, helps make any topic possible. Free /\$4.49 on Google Play It can be frustrating if you've found an icon pack that you love, but there are some apps that don't belong. Of course, you can submit an application to the developer and wait for the update to come in, but there's a better solution. With Icon Pack Studio, you can create your own icon pack while customizing each icon to your liking and it works with almost any third-party launcher. Free or \$4.49 (Pro) at Google Play Changing wallpapers is fun as long as we've been able to do it, and Tapet has been there with us for some time. With Killing, you can select the wallpaper yourself or set the app to automatically generate a new one every hour or once a day. In addition, the app will automatically detect the resolution of your smartphone, so that the wallpaper will appear crisp and not stain your home screen. Free w / IAP Google Play Some of us don't have time or want to dive through thousands of icon packs, but just want something that looks good. Whicons are not flashy (on the surface), but does work giving you a good looking icon pack on your Android phone. There are more than 5,500 custom icons, with added wallpapers to match, and Dynamic Calendar Icon support that your calendar shows the correct date. Free w/IAP Google Play Source: Ara Wagoner/Android Central In addition to customizing your phone's heart content, you can take advantage of widgets to quickly digest different bits of information. Whether you're just looking to see what the weather forecast looks like, or you need to see what's on the agenda today, there's a gadget for everything. Then other apps allow you to create your own widget with any part of the information you might think about. Best Password Managers Source: Joe Maring / Android Central Absolutely, positively, under no circumstances should you have a note about smartphone passwords listed. Hackers are better than ever today your personal information can be disclosed easier than you think. However, if you have a password manager, you can analyze these passwords, and then you'll be notified if your password has been corrupted. The app then helps you create a secure, secure, and almost unbreakable password so that your information doesn't fall into the wrong hands. 1Password hasn't always been the best choice in the Play Store, but recent updates have increased the ante and pushed it to the top of the charts. The service will give you a short trial period before you need to sign up for your subscription. And your vaults will remain protected, giving you the ability to keep important personal information safe but ready. Free w / IAP Google Play LastPass does a fantastic job of keeping all your passwords safe and secure, even if you want to stay in a free account. Then there are premium options for either single user or you can get your entire family protected by a specific plan. The service even offers security challenges that help keep your passwords updated and secure and out of hand for the bad guys. Free w / IAP Google Play When it comes to Dashlane, you can access up to 50 passwords stored on a single device in a free version, but Premium will give you even more. With a Premium subscription, users can access a personalized VPN with credit tracking and identity theft protection. Free w / IAP Google Play Stop using the same password every time you create a new login on the web. Mileage is a simple password manager that works whether you're connected to the web or not because the data is stored on your device, not on the company's servers. But you can easily sync all your passwords across your devices using popular cloud services like Dropbox, Google Drive, and more. Free w/IAP Google Play Best Messaging Apps Source: Android Central Let's be real, messaging is the primary way that almost everyone interacts with, thanks to different apps and services, it's much easier to film your mother's text than to call her and sit on her phone for an hour or more. Not everyone requires a phone conversation, and these messaging apps open doors to make it easier to communicate with friends, family, co-workers, and others. Dark design! Messages on the web! It's been a big year for Google's SMS app, and while I still miss Fashion Messenger and Textra themes, about the only third-party SMS app that can compete with the Messaging web is Pulse's paid SMS sync service, which is compatible with more platforms and browsers. Sending messages may be missing, but a dark topic is a welcome addition. Free Google Play on Android Central has been slacked for years because Slack is one of the best chat apps on the market today, whether for business or personal purposes. Themes allow us to get into without spamming the main conversation, and anyone can upload a custom slackmoji with added elegance. All it needs now is a dark topic that I will not blind my bosses when I ping them 02.m. Free Google Play SMS Organizer started a fun project with the Microsoft Garage team, but has become one of the smartest apps you can download. Although you can still send SMS messages and MMS messages, the SMS organizer creates automatic reminders from your conversations and even makes it easy to pay a friend back for dinner directly from the app. You can even easily block spam, with customizing notifications and setting specific ringtones for your contacts. Free Google Play Telegram was already one of the fastest and most popular third-party messaging customers available, but Telegram X turns things up to the limit. With the X version of the app, communication with the app is even faster and there is an improved interface, and many of the gestures you use have even more features. Free Google Play Discord is designed for gamers at heart, but increasingly is the transition messaging platform due to its integrations and ease of use. You can quickly create a user community that has easy community management while setting up member roles and inviting links. Free Google Play If end-to-end encryption is the name of the game, then Signal Private Messenger is the best choice. This service ensures that every message you send is secure, and you can even set up the app to act as the default SMS client on your Android device. You can even make audio and video calls that are guaranteed to remain private, no matter what.
